Monday, Dec. 4th
6pm-7:30pm

We often take for granted that able-bodied life can change in an instant, due to health complications, age, sudden injury, or late-onset diagnoses. Survivors must navigate challenges with accommodation and accessibility, not to mention advocate for invisible disabilities that may not readily be seen or understood.

This training will empower participants to recognize the signs of domestic and intimate partner abuse within the disability community, how to respond in a trauma-informed manner, and supportively refer survivors to helpful resources.
